

YXT.com Named to Economic Observer "2025 Top 100 New Quality Innovation Enterprises" and Recognized as "2025 AI Annual Practice Case"

March 5th, 2026

SUZHOU, China, March 05, 2026 (GLOBE NEWSWIRE) -- YXT.com Group Holding Limited (NASDAQ: YXT) ("YXT.com" or the "Company"), a provider of AI-enabled enterprise productivity solutions, recently announced that the company has been named to the **"2025 Top 100 New Quality Innovation Enterprises"** list published by Economic Observer, one of China's leading independent weekly newspapers, widely regarded for its in-depth reporting and commentary on economic, political and social developments. The company has also been recognized as a **"2025 AI Annual Practice Case"** in recognition of its AI implementation results in real-world business settings.

The list selected 100 companies in total, including industry leaders such as Alibaba, Baidu, and Xiaomi. YXT.com is the only company in the field of **AI-driven talent development and organizational capability building** to be included in this year's list. According to the published selection criteria, the list evaluates companies across four dimensions: the extent of real-world AI deployment, measurability of outcomes, replicability across scenarios, and the sustainability of technology differentiation.

Mr. Peter Lu, Founder, Chairman and Chief Executive Officer of YXT.com, commented, "Being the only company in the talent development space on a list of this caliber is a great source of encouragement for our team. It also validates our conviction: the next frontier for AI is inside the organization."

The representative case submitted for this recognition was YXT.com's **AI Role-Play Training project with Guizhou Zhen Jiu**. The project integrates AI into the training and evaluation process for business development personnel: AI simulates customer roles to recreate realistic negotiation scenarios for high-frequency practice; a standardized scoring mechanism records and provides feedback on employee performance; and quantifiable tracking metrics are established to assess the impact of training on actual business development outcomes.

YXT.com has extended its training and evaluation methodology across sales, management, and customer service roles through its **AI + PaaS technology** architecture, with deployments completed across multiple industry clients.
